in its 13<sup>th</sup> year of publication

## Summer Bulletin Board

### SHOP TALK

The custom clothing shop called Lillian Tony Ltd. at 106 East Washington Street on the north side of the building is vacating after a long business run here. Beginning August 1, the Hallimar Properties' crew will start construction on a new expanded shop with a spa at this location.

The new shop is being built for Emerge Skin Therapies, which is the popular business now located at suite 203 in The Guilford Building. Emerge owners, Azalea Yow Edwards (see left) and Mandi Smighelschi (right), are planning to incorporate two treatment rooms and a retail area into their new place.

Please be patient if construction materials spill out onto the sidewalk for a while at 106 East Washington. Everything should be buttoned up at the new shop by October 1, 2011.

### THUMBS UP FOR OUR NEW MORNING MAIL SERVICE

Danny Smithey is our new permanent mail carrier, and he says he will bring our mail to us before noon each weekday if he possibly can. What a treat after 18 years of afternoon, sometimes late afternoon, mail delivery!

Already Danny seems comfortable delivering here. He's an experienced carrier who has handled other downtown routes, and now we are benefiting from his delivery know-how.

Every summer The Guilford Building undergoes its annual fire inspection. The fire marshal could walk into the building anytime and ask to start the inspection. So everyone here should be inspection-ready.

If you have not experienced a fire inspection at The Guilford Building, pick up a fire preparation bulletin at the front desk in the lobby.

Are you ready for your annual fire inspection?

On average, more than 200 people visit or come to work at the Guilford Building each weekday.

tw telecom is bringing more fiber into the building. Watch for construction activities on the Davie Street side of the parking lot and at the driveway at the rear of the building.
